

Frontend Challenge

Instructions

1. Allocate a maximum of 24 hours for this project.
2. For preparations, you must have github accounts to do this challenge.
3. Create a private repository on your Github account.
4. Add [devbadrinteractive](#) as the collaborator of your repo.
5. Read all the instructions carefully.

Requirements

1. Follow the design specification illustrated in this Figma file - [Frontend Challenge](#)
2. Follow the technology specification
 - a. Programming language: Javascript or Typescript
 - b. Framework: ReactJS
 - c. It is recommended to use this library, but it's not required.
 - i. ReactJS: NextJS
 - ii. CSS: Tailwind
 - iii. Data fetch: Axios, React Query
3. The mock API documentation can be found on the link - [API documentation](#)
 - a. This is mock API, so it doesn't work as intended. But the data requested and responded to, must be as documented.
4. The features you need to work on are:
 - a. View order list
 - i. Including search by name and order date
 - b. Create a new order
 - i. After product is selected, the price will be displayed in price form
 - ii. Total product price is updated automatically whenever product and quantity change
 - c. Edit an order
 - i. Can't change customer name
 - d. Delete an order
 - i. Show your own confirmation dialog before delete an order
 - e. View detail order

Submission

1. After you are done, create a merge request in your private repository and invite [devbadrinteractive](#) as the reviewer
2. The last merge request will be graded
3. In your pull request description, please add the following information:
 - a. Full Name
 - b. Email Address
 - c. Feedback on this assessment
